**Telescopic spirit level type 80 T:
Always have the right length of level
to do the job**

“To be prepared for all potential problems, I always had to take several spirit levels with me onto the construction site.”

Sascha Hebing
S&H Montagetechnik

“Until now!”

The solution:

Telescopic spirit level type 80 T

Always have the right length of level to do the job: one spirit level now does the work of several.

Part 1: The long-term precision

STABILA installation technology

- 1 Vial
- 2 Vial block holder
- 3 Profile
- 4 Synthetic resin

The unique installation technology ensures long-term accuracy. In a special casting process, the components of the spirit level are firmly bonded forever. You can trust that your spirit level will maintain its accuracy for life.

It remains accurate, just as it was on the first day. No readjustments, no doubts. Always accurate measurements – even under the most difficult construction site conditions.

Adjusted with micrometre precision and unshakeably bonded

In STABILA spirit levels, the vial, the vial block holder and the measuring surfaces of the profile are adjusted precisely to one another in the production process and permanently bonded with synthetic resin. Only in this manner is it

guaranteed that all components are parallel and unshakeably aligned to one another so that the spirit level measures accurately even after many years of rugged use.

Printed metric scale to work out inner dimensions and clearances

Marking and cutting edge along entire length – measure and mark simultaneously, even when extended

Takes the place of up to 3 separate lengths – no need to carry around several spirit levels any more

2 lengths available:

- 63 cm, can be extended up to 105 cm
- 80 cm, can be extended up to 127 cm

High-quality telescopic system for extending the measuring surface – the spirit level can be flexibly set to the length needed

Integrated anti-slip stoppers allow for a firm hold when marking – the spirit level does not slip

Part 2: The application benefits

Thanks to the telescopic system, the tradesman can set the spirit level to precisely the length needed for the job.

Telescopic spirit level type 80 T

Made in
Germany

Accuracy in normal position

0.029° = ±0.5 mm/m (closed)
0.057° = ±1.0 mm/m (extended)

Accuracy in reverse position

0.043° = ±0.75 mm/m (closed)
0.057° = ±1.0 mm/m (extended)

Measuring surfaces

1 X

Vial type

1 x horizontal
1 x vertical

End caps

With anti-slip stoppers

Special features

Telescopic system
LOCK system
Printed metric scale

Lengths

63 – 105 cm

80 – 127 cm
