

The TURBOShaft™ is Arbortech's latest power carving attachment for your angle grinder. Designed to complement the Arbortech TURBO range or as a stand alone tool, the TURBOShaft™ provides detailed freehand carving to perfectly combine efficiency and exceptional control.

The TURBOShaft™ is fitted with replaceable carbide teeth for excellent performance and durability even in the hardest timbers. The adjustable depth gauge makes it easy to quickly set your cutting depth. The unique new TURBOShaft™ technology is a versatile addition to any woodworkers arsenal. Perfect for deep and narrow profiles, detailed sculpting, letterwork, template work and more.

#### SAFETY INSTRUCTIONS:

**WARNING:** Read and understand all safety warnings, instructions, and tool markings before starting any work. Failure to follow the instructions may result in serious injury.

1. Keep work area safe, clean and well lit. Keep children and bystanders away while operating the tool.
2.  Use personal protective equipment such as face shield, suitable safety gloves and dust mask.
3. This tool must only be used on an angle grinder fitted with an auxiliary side handle. Always use two hands to operate the grinder and ensure that work piece is firmly secured.  
(see Diagram 1 - side handle)
4. Carefully follow assembly and blade mounting instructions (see Diagram 1)
5. Keep tool sharp and ensure cutter fixing screws are firmly tightened before use. Do not use when blunt. Do not apply excessive force. (see Diagram 2)

Included with the TURBOShaft™: 1 x TURBOShaft™  
1 x Depth Gauge  
1 x Allen Key  
Torx™ key

- Excellent control and safety
- Fits to any standard angle grinder
- Replaceable tungsten carbide teeth
- Can be used with guides or templates for accuracy
