

Globe-Arc Welding Helmet

A new hybrid design of flip up welding and cutting helmet

The Globe-Arc is the latest design in flip up welding and grinding helmets. The visor provides effective protection from UV and IR radiation when visor is open and closed, and is available in different shade levels.

Features

The new hybrid shell follows the ESAB family design. Made from an extremely strong Zytel material, the shell offers a full head and face protection, whilst being very lightweight

The compact design allows for welding in very tight places, whilst reducing the visible light entering the back of the helmet, caused by other welding light

The new Flip Visor has a upper retention stop, which eliminates the visor dropping down when welding or grinding

The visor also has Shake Proof ¼ turn retainers, which allows for quick removal and replacement of visors

The Globe-Arc is suitable for all welding applications because of the availability to choose from different visor shades.

The helmet has a very wide field of vision both on the large main visor and flip up visor. > Providing increased work safety

The visor has a flat top brow for easy put downs, and prevents the visor from scratching.

The helmet is fitted with the new ESAB Comfort Headgear. Constructed from quality Nylon, with a large adjustment ratchet, and comfort sweat band.

The Globe Arc can be used in combination with the Origo Air respiratory unit. The helmet is delivered fully assembled and includes Flame resistant head and face seal and air duct.

Main Visor

1.8mm Thick

Available in : clear, UVIR 2, UVIR 3 & UVIR 5

B Impact Rating EN 166 – Approved for Grinding

Allows visible light to go through when welding, but blocks harmful UV-radiation (No Red-Eye Effect). Helmet can be used for heavy-duty welding with high amps

Moulded Flip Welding Visor

Available in: UVIR 5, UVIR 8 & UVIR 10
