

POC Comprehensive Management Platform POC & PMR Interconnection Solution

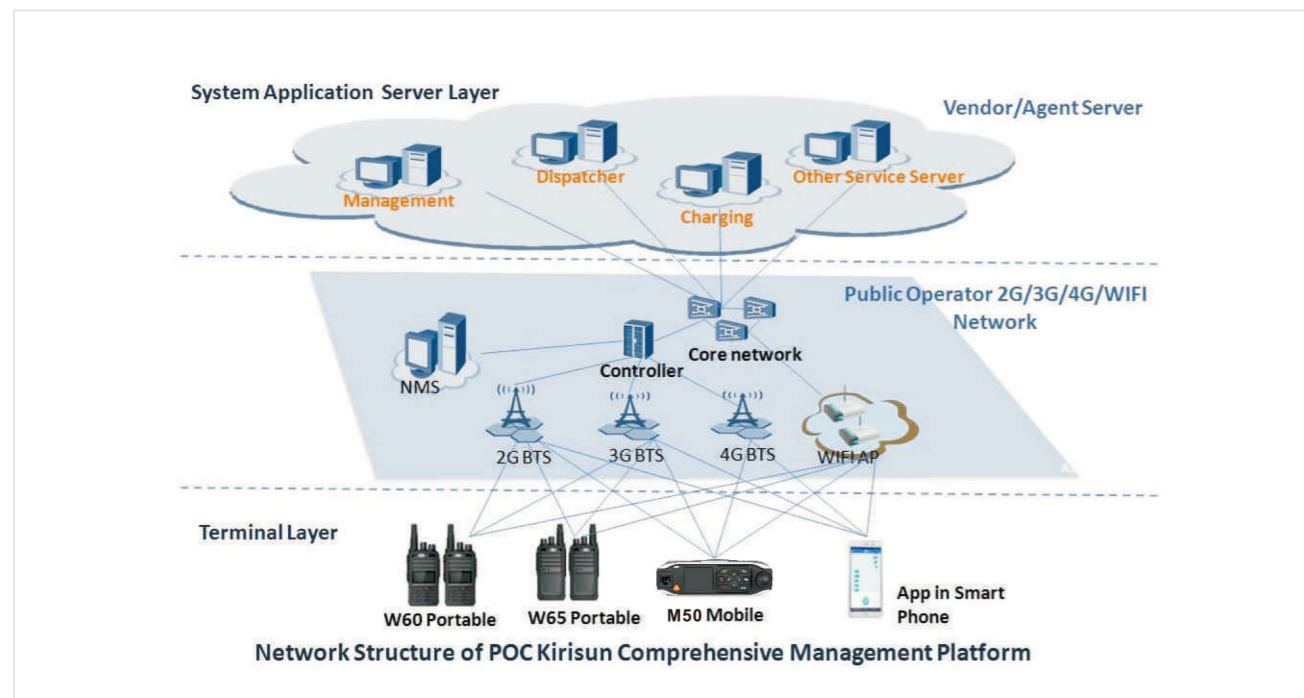

- ★ Comprehensive management platform meets different organization structures, distribution channel structures, enables flexible ways of managing device and agent assets
- ★ Multimedia dispatcher combining audio, video and GIS technologies providing user-friendly GUI and convenient audio-visual operations of dispatching
- ★ Interconnection solution provides intercommunication between systems in different regions, or with different protocols, or with different frequency ranges

SVB POC Management & Intergrated Solutions

4-level management meets various management requirements within different organizations

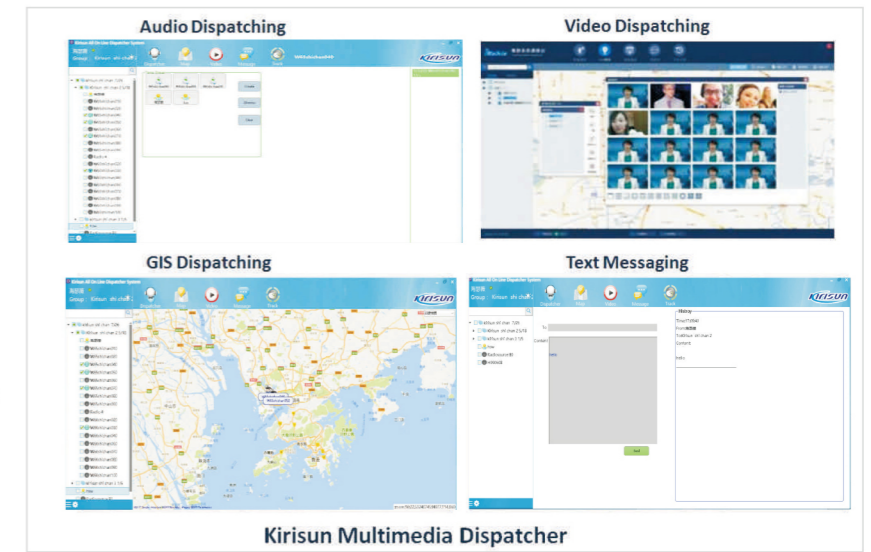

- ★ Flexible and convenient way of managing device assets and client resources
It supports setting different authorizations and functions in different levels.
- ★ Easy-to-deploy and easy-to-expand platform
Cloud-based server supporting all-in-one deployment and distributed deployment enables load balance, flexible scalability, high stability, high reliability & high efficiency.
- ★ Versatile functions and one-stop management
Combining dispatcher and video surveillance in one platform provides one-stop management.
- ★ User-friendly web-based GUI providing easy operation and excellent user experience
The management platform supports login by Web-Browser or App installed in smart phone, supports managing operation with multimedia technologies: audio, video, GIS.
- ★ All-round information lookup functions
The platform provides various information like device inventory management, GPS locations of two-way radio, online / offline / calling status, member profile, etc.

SVB POC Management & Intergrated Solutions

Multimedia dispatcher provides user-friendly dispatching operation

- ★ Cloud-based, scalable dispatching platform
- ★ Easy to deploy and expand
- ★ User-friendly GUI with high-quality image, audio & video
- ★ Advanced audio / video processing technologies
- ★ GIS provides real-time user status, group status, location display and user motion track record & playback
- ★ Versatile dispatching features: private call / group call / all call / Ambience listening / Discreet monitor / kill / stun / revive
- ★ Information lookup

Interconnection & intercommunication

- ★ Interconnect systems in different regions, systems with different protocols, systems with different frequency ranges to realize intercommunication
- ★ Centralized management
- ★ Achieve larger capacity and larger coverage by interconnecting different systems
