Cordless mixing –
wherever you want

Collomix

Cordless mixer

Xo 10^{NC}

Electric power for the champion on the construction site!

Cordless mixing – at long last. State-of-the-art technology to suit professional requirements

Independence during mixing work, without being dependent on the nearest socket outlet. Mix wherever the material is being processed: in the underground car park, on the scaffolding, in the shell, in the courtyard or in the open countryside.

The powerful 18 V, 5.2 Ah Li-ion battery of the Collomix **Xo 10^{NC}** ensures sufficient range and torque, even with denser and plastic materials such as ready-mixed mortar

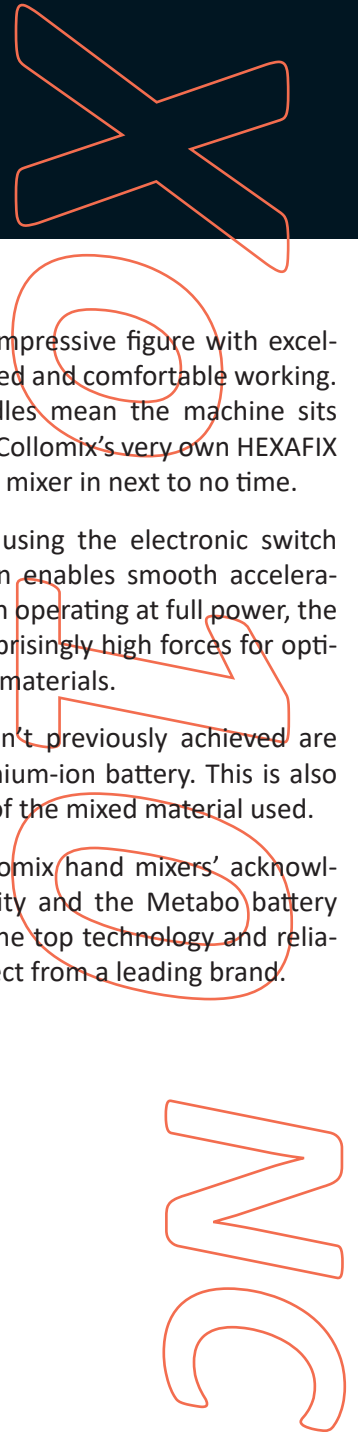

or adhesives.

The cordless mixer cuts an impressive figure with excellent ergonomics for uncramped and comfortable working. Ergonomically adapted handles mean the machine sits well in your hands. And with Collomix's very own HEXAFIX coupling, you can change the mixer in next to no time.

Electronic speed regulation using the electronic switch with a safety on/off function enables smooth acceleration and clean working. When operating at full power, the electric motor unleashes surprisingly high forces for optimum homogenisation of the materials.

A range of mixes that weren't previously achieved are available with the 5.2 Ah lithium-ion battery. This is also determined by the viscosity of the mixed material used.

The combination of the Collomix hand mixers' acknowledged expertise and reliability and the Metabo battery system offers professionals the top technology and reliability they have come to expect from a leading brand.

Machine features

Powerful 18 V, 5.2 Ah Li-ion battery for consistently high power output and optical charging indicator

Ergonomically ideal working height and pleasant grip position; well-balanced device

Made for mixing:
Reliable and high-performance precision gearbox for torque and service life

Safety switch with acceleration function for controllable speed

Powerful latest-generation drive motor

Mixer changeover made easy, with the HEXAFIX quick-change coupling

Everything firmly in place:
Thrust holder for the battery with secure fixation; with button to release

The Xo 10^{NC}'s Metabo battery system

“AIR COOLED” Li-ion battery fixture battery packs

- Metabo's Ultra-M technology: intelligent battery management for long-life battery packs with three-year guarantee
- Patented “AIR COOLED” charging technology – for shorter charging times
- Permanent electronic single cell monitoring (ESCP) when charging, for a particularly long service life
- Processor-controlled charge and discharge management
- Optical capacity indicator for permanent checking of the capacity status
- No memory effect
- Long shelf life with next to no self-discharge

Sample applications

EP coating / paints

Self-levelling compound

Slurry

Natural stone mortar

Tile adhesive

Grout

Adhesive and reinforcing mortar

Egalisation filler

Suitable mixers

WK 120 HF
for ready-mixed mortar, plaster, screed, medium-bed and thick-

KR 120 HF
for tile and adhesive mortar, filler, grout

DLX 120 HF
for self-levelling compounds, sludges, thin-bed mortar

LX 120 HF
for paints, coatings, sealings

Technical data for Xo 10^{NC}

First gear load speed	-640 rpm
Set mixer	WK for ready-mixed mortar, plaster, screed
Max. mixer Ø	120 mm
Mixer connection	HEXAFIX quick coupling
Max. mixed quantity	- 40 ltr.
Metabo battery pack	18 V, 5.2 Ah Li-ion
Charging time for battery Ø	Approx. 100 min.

Scope of delivery **20490**
Xo 10^{NC} set with one 18 V, 5.2 Ah battery, charger and WK 120 HF mixer

Scope of delivery **20492 (KAR)**
Xo 10^{NC} with WK 120 HF mixer not including 18 V, 5.2 Ah battery and charger
